SUMMARY

Project and delivery professional with 8 years in the Netherlands at Huawei, Amazon, Philips and Tencent. I coordinate delivery between engineering, business and customer-facing teams: tracking milestones, running go-live readiness, escalating risks early and leaving documentation that outlives the project. Dutch citizen, based in the Utrecht and Eindhoven region, working in English daily. MBA in AI, Data & Analytics (2026).

EXPERIENCE

Tencent

Amsterdam

Project Manager, PUBG Mobile Esports Marketing

May 2025 - June 2026

- Managed cross-regional coordination across Europe, MENA, and Asia, ensuring alignment between regional priorities and HQ strategy.
- Built an AI-enabled workflow for viewer survey reporting, reducing manual processing by ~3 hours per week.
- Partnered with the Esports Data Center product manager to provide analysis and support decisions on user engagement features.
- Delivered a Europe-wide mailbox migration as local project manager: tracked readiness per office, wrote 2 user manuals, ran Q&A sessions and 1-on-1 support, and went live on schedule with zero complaints; the documentation was reused by other regions.

Tencent

Amsterdam

Customer Relationship IT Project Manager

August 2023 - May 2025

- Managed customer relationships across three game studios, promoting tailored IT solutions that achieved \$91,000 in annual cost savings.
- Led IT PMO initiatives across 3 regions, improving operational efficiency and standardizing studio adoption strategies for new technologies.
- Worked closely with HR & Finance teams on onboarding processes, acting as the operational bridge between IT systems and people workflows.
- Served as EU Product Owner for Security and Foundation IT products, aligning EMEA, Asia, and US project roadmaps with studio business needs.
- Coached 2 junior IT specialists and 4 interns, fostering the professional development and ensuring high-quality support for daily IT operations.

Philips

Amsterdam

Product Owner, Amazon Ads Dashboards

November 2021 - August 2023

- Designed and implemented 4 marketing dashboards with engineers, boosting campaign activation productivity by 15%.
- Delivered actionable insights on audience segmentation and optimal ad frequency from Amazon Marketing Cloud data, contributing to a 10% uplift in campaign performance.
- Partnered with media and analytics teams to implement improvements in campaign targeting and ROI.
- Collaborated with Amazon Ads and AWS to design and launch 3 new product features for the Amazon Marketing Cloud platform.

Amazon

The Hague

Amazon Vendor Service Consultant

July 2019 - November 2021

- Led 2 cross-regional automation projects, achieving operational efficiency savings equivalent to 1.8 full-time headcounts.
- Facilitated the launch of Amazon's Dutch marketplace by developing and implementing 2 new web tools and SOPs to optimize product selection and defect elimination.
- Built 3 Amazon QuickSight dashboards to enable data-driven decisions, improving e-commerce data quality by 30% and reducing reporting errors by 25%.

- Rebuilt ticket handling across 4 European marketplaces using own SQL analysis: resolution time (TP90) from 18 to 8 days and ticket inflow down 21%; the SOP stayed in use after I left.
- Advised over 10 e-commerce vendors on growth strategies, leveraging data-driven insights to increase product visibility and optimize campaign performance.
- Trained and mentored 10+ new hires and 3 internal teams on technical learning and development best practices.

Huawei Technologies B.V.
Marketing Financial Controller

The Hague
February 2018 - June 2019

- Coordinated marketing and retail campaigns with budgets exceeding \$30M, fostering cross-functional collaboration for seamless execution.
- Evaluated campaign performance to improve online & offline visibility, achieving a 15% increase in post-campaign engagement.
- Increased budget forecasting accuracy from 82% to 96% by developing an automation tool for ROI analysis of marketing campaigns.
- Provided quarterly budget allocation reports to C-level executives, optimizing both revenue and campaign performance.

CaCa Media B.V.
Public Relations Intern

Amsterdam
June 2017 - November 2017

- Coordinated PR and business development for a Chinese company expanding overseas, contributing to an increase in brand awareness and identifying 5 new business opportunities across Europe.

PROJECT

MBA Thesis: AI-powered Career Exploration Platform
University of Amsterdam MBA in AI, Data & Analytics

- Designing and developing an AI-powered career exploration platform that combines psychometric assessment, user insight, and AI-guided career support.

AI Product Manager Hackathon
2025.11 - 2026.2

- Conducted in-depth research on leading AI products and created AI-powered products with a team.
